

LEONARDO SECOTARO

Guaymallén, Mendoza, Argentina | +54 261 5712839 | leonardosecotaro@gmail.com

Portfolio: leonardo-secotaro.netlify.app

PROFESSIONAL PROFILE

Information Systems Engineer with experience in software development, data analysis, and IT infrastructure support. Practical experience with Python, Ruby on Rails, Node.js, React.js, SQL, and Linux, complemented by knowledge in data engineering, Machine Learning, and cybersecurity. Problem-solving oriented, focused on developing end-to-end technological solutions.

PROFESSIONAL EXPERIENCE

Servicios de Cardiología S.A.

Jan 2026 - Mar 2026 | Jul 2026 - Present

Developer / Data Analyst & IT Support

- **Development & Architecture:** End-to-end design and implementation of an interactive, real-time medical appointment management system.
- **Data Engineering:** Data extraction, transformation, and structuring for financial metrics comparison modules and reports.
- **IT Operations:** Maintenance, internal infrastructure monitoring, and technical incident resolution ensuring operational continuity.

Secretaría de Extensión (UTN)

Mar 2026 - Jul 2026

Full Stack Developer & IT Analyst

- **Web Development:** Requirements analysis, functional design, and continuous maintenance of the Secretariat's official portal.
- **DevOps & Infrastructure:** Implementation of continuous integration (CI) pipelines, academic information structuring, and server monitoring.

FEATURED PROJECTS

- **HomeFixing Platform:** Full Stack development of a social network (Client-Server architecture). Secure backend in **Ruby on Rails** managing authentication and REST APIs over **MySQL**. Responsive frontend in **React.js**.
- **RAG System - Cinematic Domain:** Graph data modeling (**Neo4j**) and integration of the local LLM **Gemma3:4b** via **Ollama** and LangChain. Creation of an NLP workflow that interprets queries and generates contextualized responses about movies using Cypher.
- **Automated ETL Pipeline & Machine Learning:** Orchestration with **Apache Airflow** and **Python** for massive data extraction, cleaning, and transformation from the TMDb REST API (+10k records). Training of a movie revenue predictor model using **Scikit-learn** (R^2 : 79%).
- **Infrastructure Management & SOC (Security):** Network traffic monitoring, vulnerability detection, and protocol analysis using specialized tools such as **Wireshark**, **Nmap**, **Snort**, and **Ettercap**. Administration of Linux (Ubuntu) environments.

EDUCATION & COURSES

- **Information Systems Engineering:** Universidad Tecnológica Nacional (UTN) (2021 - 2026) - Degree completed.
- **Backend Development Course:** Training in **Node.js**, **Express**, and **MySQL** for building servers and REST APIs.
- **Cybersecurity Courses (TryHackMe):**
 - **CyberSecurity 101** (Completed): Theoretical and practical fundamentals of offensive/defensive security, networking concepts (**OSI**, **TCP/IP**), basic cryptography, and exploitation of common web vulnerabilities.
 - **SOC Level 1** (In progress): Training in defensive operations (**Blue Team**), security monitoring (Network, Web, Windows, Linux), and incident triage. Operation of Core SOC solutions (**SIEM**, **EDR**, **SOAR**) with practical focus on **Elastic Stack (ELK)**, queries in **Kibana**, and **Splunk** for log investigation and threat analysis.

TECHNICAL SKILLS

Development & Web: Python, Ruby on Rails, Node.js, Express, React.js, JavaScript, HTML/CSS, REST APIs.

Data & AI: Apache Airflow, ETL, Scikit-learn, LangChain, LLM Models (Ollama), UML.

Databases: SQL, MySQL, Graphs (Neo4j).

Infrastructure & DevOps: AWS S3, Linux (Ubuntu), Git/GitHub, CI/CD.

Security & Support: SIEM (Elastic Stack/ELK, Splunk), EDR, SOAR, Networking, Nmap, Wireshark, Snort, Ettercap, HW/SW Management.

LANGUAGES & SOFT SKILLS

Languages: English (B2 Level - Upper-Intermediate), Spanish (Native).

Soft Skills: Problem-solving, resilience, adaptability, effective communication, teamwork.
