

LEONARDO SECOTARO

Guaymallén, Mendoza, Argentina | +54 261 5712839 | leonardosecotaro@gmail.com

PROFESSIONAL PROFILE

Information Systems Engineer with a comprehensive background in development, data analysis, solution design, and IT infrastructure support. Specialized in Full Stack development of dynamic and scalable applications using Python, Ruby on Rails, and React.js. Solid experience in data engineering, automated ETL pipeline creation, and the implementation of Machine Learning solutions and generative models. Focused on business process optimization, database architecture modeling, and ensuring operational continuity through network monitoring, cybersecurity, and efficient incident resolution using agile methodologies.

PROFESSIONAL EXPERIENCE

Servicios de Cardiología S.A.

January 2026 - Present

- End-to-end development, requirements gathering, and logical design of an interactive, real-time medical appointment management system.
- Data extraction, transformation, and structuring to build a financial metrics comparison module.
- Development of efficient SQL queries integrated with frontend visualization to generate reports that facilitate strategic decision-making.
- Support, maintenance, and monitoring of internal systems, ensuring the operability of the technological infrastructure, addressing technical requirements, and resolving incidents.

Secretaría de Extensión Universitaria (UTN)

March 2026 - July 2026

- Full Stack development, requirements analysis, functional design, and continuous maintenance of the Secretariat's official website.
- Implementation of continuous integration pipelines, structuring of academic information, and construction of user-centric scalable interfaces.
- Web infrastructure management, software installation, configuration of technical deployments, and performance reporting, ensuring availability and scalability.

FEATURED PROJECTS

- **Home Services Platform (HomeFixing):** Full Stack development and Client-Server architecture design for a social network aimed at connecting workers and clients. Built a complex backend in Ruby on Rails managing authentication and RESTful APIs over a MySQL database, along with a responsive frontend in React.js.
- **Retrieval-Augmented Generation (RAG) System:** Modeled the cinematic domain in graphs (Neo4j) and integrated the local language model Gemma3:4b via Ollama. Designed a workflow that interprets natural language queries, queries the graph using Cypher, and generates contextualized responses about movies, genres, and actors.
- **Automated Data Pipeline (ETL):** Workflow orchestration using Apache Airflow and Python for the extraction, cleaning, and transformation of massive data from the TMDb REST API. The normalized data was used to train a movie revenue predictor model (based on variables such as actors, directors, and release dates) using Scikit-learn, achieving a coefficient of determination (R^2) of 79%.
- **Infrastructure Management & SOC (Security):** Network traffic monitoring, vulnerability detection, and protocol analysis using specialized tools such as Wireshark, Nmap, Snort, and Ettercap. Hardware administration, workstation configuration, and advanced partitioning in Linux (Ubuntu) environments.

EDUCATION & COURSES

- **Information Systems Engineering:** Universidad Tecnológica Nacional (UTN) (2021-2026) - Degree completed.
- **Cybersecurity Courses (TryHackMe):** CyberSecurity 101 (Completed) and SOC Level 1 (In progress).

TECHNICAL SKILLS & TOOLS

- **Development:** Ruby on Rails (Advanced), Python (Advanced), React.js (Advanced), JavaScript, HTML/CSS, Ruby, RESTful APIs.
- **Data & Analytics:** Apache Airflow, ETL, Scikit-learn, LangChain, Data Analysis and Modeling (UML).
- **Databases:** SQL (Advanced), MySQL (Advanced), Graph Modeling (Neo4j).
- **Infrastructure & Cloud:** AWS S3, Git/GitHub (Advanced), Windows and Linux environments (Advanced Ubuntu, terminal management).
- **Support & Security:** HW/SW Maintenance, Ticketing System Management, User Access Management (IAM), SLA Tracking, Nmap, Wireshark, Snort, Ettercap.

SOFT SKILLS

Problem-solving, resilience, patience, teamwork, adaptability, and effective communication.

LANGUAGES

- **English:** Upper-Intermediate (B2)
- **Spanish:** Native
